

Diesel Generator Set

mtu 16V2000 DS1100

380V - 415V/50 Hz/prime power for stationary emergency/ fuel consumption optimized/16V2000G26F/air charge air cooling

Optional equipment and finishing shown. Standard may vary.

Product highlights

Benefits

- Low fuel consumption
- Optimized system integration ability
- High reliability and availability of power
- Long maintenance intervals
- Optimized ratio between size and power
- Wide operating range without derating

Support

Global product support offered

Standards

- Engine-generator set is designed and manufactured in facilities certified to standards ISO 2008:9001 and ISO 2004:14001
- Generator set complies to G3 according to ISO 8528
- Generator meets NEMA MG1, BS5000, ISO, DIN EN and IEC standards
- NFPA 110

Power rating

- System rating: 1000 kVA
- Accepts rated load in one step per NFPA 110
- Generator set complies to G3 according to ISO 8528-5
- Generator set exceeds load steps according to ISO 8528-5

Performance assurance certification (PAC)

- Engine-generator set tested to ISO 8528-5 for transient response
- 85% load factor for continuous power applications
- Verified product design, quality and performance integrity
- All engine systems are prototype and factory tested

Complete range of accessories available

- Control panel
- Power panel
- Fuel system
- Fuel connections with shut-off valve mounted to base frame
- Starting/charging system
- Exhaust system
- Mechanical radiator
- Oversized voltage alternators

Emissions

- Fuel consumption optimized
- NOx emission optimized, Tier 2 compliant and NEA (ORDE) optimization optionally available

Certifications

- CE certification option
- VDE4110 certification

Application data¹⁾

Engine	Fuel cor	nsump. opt.	Emission opt. ²⁾
Manufacturer		mtu	mtu
Model	16V	2000G26F	16V2000G26F
Туре		4-cycle	4-cycle
Arrangement		16V	16V
Displacement: l		35.7	35.7
Bore: mm		135	135
Stroke: mm		156	156
Compression ratio		17.5	17.5
Rated speed: rpm		1500	1500
Engine governor	AD	EC (ECU 9)	ADEC (ECU 9)
Speed regulation		± 0.25%	± 0.25%
Max power: kWm		890	890
Mean effective pressure: bar		19.9	19.9
Air cleaner		dry	dry
Fuel system			
Maximum fuel lift: m		5	5
Total fuel flow: l/min		30	30
Fuel consumption 3)			
At 100% of power rating: I/hr	g/kWh	205/191	216/201
At 75% of power rating: I/hr	g/kWh	156/194	165/205
At 50% of power rating: I/hr	g/kWh	108/202	115/214
Lube oil system			
Total oil system capacity: l		102	102
Max. lube oil temp. (alarm): °C		103	103
Max. lube oil temp. (shutdown):	°C	105	105
Min. lube oil pressure (alarm): b	ar	4.5	4.5
Min. lube oil pressure (shutdow	n): bar	4	4
Combustion air requirements			
Combustion air volume: m³/s		1.03	1.19
Max. air intake restriction: mbar	-	40	40

Cooling/radiator system Fuel consu	ump. opt.	Emission opt. ²⁾
Coolant flow rate (HT circuit): m³/hr	41.6	41.6
Heat rejection to coolant: kW	370	350
Heat radiated to charge air cooling: kW	145	205
Heat radiated to ambient: kW	40	40
Fan power for mech. radiator (40°C):	43.4	43.4
Fan power for mech. radiator (50°C):	43.4	43.4
Air flow required for mech. radiator (40°C)		
cooled unit: m³/min	1462	1462
Air flow required for mech. radiator (50°C)		
cooled unit: m³/min	1462	1462
Engine coolant capacity		
(without cooling equipment): l	70	70
Radiator coolant capacity (40°C): l	74	74
Radiator coolant capacity (50°C): l	106	106
Max. coolant temperature (warning): °C	102	102
Max. coolant temperature (shutdown): °C	105	105
Exhaust system		
Exhaust gas temp. (after turbocharger): °C	530	515
Exhaust gas volume: m³/s	2.78	3.07
Maximum allowable back pressure: mbar	50	50
Minimum allowable back pressure: mbar	30	30
Generator		
Protection class	IP23	IP23
Insulation class	Н	Н
Voltage regulation (steady state)	± 0.25%	± 0.25%
Rado interference class	Ν	Ν

1 All data refers only to the engine and is based on ISO standard conditions (25°C and 100m above sea level).

2 Emission optimized data refer to TNOx emission optimized and NEA (ORDE) optimized/Tier 2 compliant engines.

3 Values referenced are in accordance with ISO 3046-1. Conversion calculated with fuel density of 0.83 g/ml. All fuel consumption values refer to rated engine power.

Standard and optional features

System ratings (kW/kVA)

Generator model	Voltage	with mechanical radiator**		
		kWel	kVA*	AMPS
Leroy Somer LSA 50.2 M6 (Low voltage Leroy Somer standard)	380 V	800	1000	1519
	400 V	800	1000	1443
	415 V	800	1000	1391
Leroy Somer LSA 50.2 L7 (Low voltage Leroy Somer oversized)	380 V	800	1000	1519
	400 V	800	1000	1443
	415 V	800	1000	1391
Marathon 740RSL7183 (Low voltage Marathon standard)	380 V	800	1000	1519
	400 V	800	1000	1443
	415 V	800	1000	1391
Marathon 742RSL7185 (Low voltage Marathon oversized)	380 V	800	1000	1519
	400 V	800	1000	1443
	415 V	800	1000	1391

* cos phi = 0.8

** BE, fuel optimized: max. power available up to: open power unit 40°C/400m; NOx emission optimized, EPA Tier 2 compl., NEA: standard operating conditions/open power unit 25°C/100m

Governor-electronic isochronous

Common rail fuel injection

Electric starting motor (24V)

Drv exhaust manifold

Electrical outputs may vary depending on generator voltage and ambient conditions. For power outputs consult your *mtu* dealer. Intake air depression/mbar: 15mbar

Exhaust back pressure/mbar: 30mbar

Engine

4-cycle

Generator

generator

self-ventilated

Digital voltage regulator

Anti condensation heater

Stator winding Y-connected,

accessible neutral (brought out)

- Standard single stage air filter
- Oil drain extension & shut-off valve

Leroy Somer low voltage generatorMeets NEMA MG1, BS5000, IEC 60034-1,

VDE 0530, DIN EN 12601, AS1359

Solid state, volts-per-Hertz regulator

Brushless, self-excited, self-regulating,

■ 4 pole three-phase synchronous

and ISO 8528 requirements

Superior voltage waveform

- Full flow oil filters
- Closed crankcase ventilation
- - Protection IP 23

ADEC/ECU9

- less than 5% harmonic distorsion
- 2/3 pitch stator windings
- No load to full load regulation
- ± 0.25% voltage regulation no load to full load
- Insulation class H, utilization acc. to H
- Radio suppression EN55011, group 1, cl. B
- Short circuit capability 3xIn for 10sec
- Sustained short circuit current of up to 300% of the rated current for up to 10 seconds (Leroy Somer generator)
- Winding and bearing RTDs (without monitoring)

- Fuel consumption optimized engine
- $\hfill\square$ NOx emission optimized engine
- □ Tier 2 optimized engine
- $\hfill\square$ NEA (ORDE) optimized engine
- Excitation by AREP + PMI
- Mounting of CT's: 3x 2 core CT's
- Voltage setpoint adjustment ±10V
- Sustained short circuit current of up to 250% of the rated current for up to 10 seconds (Marathon generator)
- □ Marathon low voltage generator
- Oversized generator

Represents standard features

Standard and optional features

Cooling system

- Jacket water pump
- Thermostat(s)

Air charge air cooling

gensets (V7)

Deif controller

□ Basler controller

Digital metering

Engine parameters

Engine protection

Event recording

Parametrization software

Multiple contact outputs

Multilingual capability

Complete system metering

Generator protection functions

SAE J1939 engine ECU communications

Multiple programmable contact inputs

Mechanical radiator

□ Mains parallel operation of multiple

□ Jacket water heater

- Control panel
- Pre-wired control cabinet for easy application of customized controller (V1+) \Box Island operation (V2)
- □ Automatic mains failure operation with ATS (V3a)
- □ Automatic mains failure operation incl. control of generator and mains breaker (V3b)
- □ Island parallel operation of multiple gensets (V4)
- \Box Automatic mains failure operation with short (< 10s) mains parallel overlap synchronization (V5)
- □ Mains parallel operation of a single genset (V6)

Power panel

□ Available in 600x600

□ Phase monitoring relay 230V/400V

Fuel system

Flexible fuel connectors mounted to	Fuel filter with water separator	🗆 Fuel coole
base frame	\square Switchable fuel filter with water separator	

Starting/charging system

24V starter

Mounting system

Welded base frame

Exhaust system

- □ Exhaust bellows with connection flange
- □ Exhaust silencer with
 - 10 dB(A) sound attenuation
- □ Exhaust silencer with 30 dB(A) sound attenuation

- IP 54 front panel rating with integrated gasket
- □ Different expansion modules
- □ Remote annunciator
- Daytank control
- □ Generator winding and bearing temperature monitoring
- Differential protection with multi-function protection relay

□ Plug socket cabinet for 230V

□ Modbus TCP-IP

□ Supply for jacket water heater compatible Euro

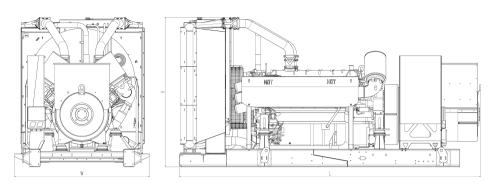

□ Supply for battery charger

- er
 - □ Starter batteries, cables, rack, disconnect switch

Resilient engine and generator mounting

- □ Battery charger □ Redundant starter 2x 7.5KW
- Modular base frame design
- Exhaust silencer with 40 dB(A) sound attenuation □ Y-connection-pipe

Weights and dimensions

Drawing above for illustration purposes only, based on a standard open power 400 Volt engine-generator set. Lengths may vary with other voltages. Do not use for installation design. See website for unit specific template drawings.

System	Dimensions (LxWxH)	Weight (dry/less tank)
Open power unit (OPU)	4440 x 1990 x 2200 mm	6550 kg

Weights and dimensions are based on open power units and are estimates only. Consult the factory for accurate weights and dimensions for your specific engine-generator set.

Sound data

Emissions data

- Consult your local *mtu* distributor for sound data.
- Consult your local *mtu* distributor for emissions data.

Rating definitions and conditions

- Prime power for stationary emergency ratings apply to installations served by a reliable utility source. The standby rating is applicable to varying loads for the duration of a power outage. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO 8528-1, ISO-3046-1, BS 5514 and AS 2789. Average load factor: ≤ 85%. Operating hours/year: max. 500.
- Consult your local *mtu* distributor for derating information.
